Education

Bachelor of Engineering, Computer Science

Aug 2023 – Apr 2027

Nanyang Technological University, Singapore

Second Major in Entrepreneurship; projected Second Upper Class Honours

Exchange Semester, Computer Science

Jan 2026 – Apr 2026

Queen's University, Kingston, Canada

Artificial intelligence, machine learning, human-computer interaction, and graduate-level networking

Diploma, Engineering With Business

2019 – 2021

Singapore Polytechnic

Experience

Part-time Research Intern

Current

Acoustics Research Lab, National University of Singapore

Final-year thesis at NTU: *Integrated Communications, Sensing, and Propulsion (ICSP)*, investigating thrusters as transmitters.

Software and Data Intern

Jun 2025 – Dec 2025

Axoft, Cambridge, Massachusetts

Built hardware-in-the-loop systems for neural electrophysiology data acquisition, synchronization, and real-time processing, including a live decoding pipeline.

National Serviceman

Jul 2021 – Jun 2023

Singapore Armed Forces, Singapore

Built and maintained internal software systems for administrative process automation, reducing manual effort by 200x.

Robotics Engineering Intern

Sep 2020 – Jun 2021

Government Technology Agency of Singapore

Built autonomous ground vehicles with cross-fleet communications using ROS and RMF, integrated sensors and software drivers, and implemented a contact-tracing system used by Singapore's Ministry of Health.

Leadership and Student Organizations

Head, Mecatron – Nanyang Technological University

Jul 2026 – Present

Coordinate work across digital software, networking, infrastructure, PCB design, power systems, and communications architecture; oversee team operations, logistics, external partnerships, and research projects in underwater acoustics and control systems.

Lead of Software and Electrical Systems, NVF Racing

Nov 2023 – Nov 2024

Designed and assembled PCBs for vehicle sensors, dashboard, safety-stop systems, and the main vehicle control unit; served as Electrical Safety Officer and taught embedded programming and PCB design.

Publication

Multi-modal, multi-species, and multi-task latent-space model for decoding level of consciousness

NeurIPS 2025 Workshop on Foundation Models for the Brain and Body.

Wang et al.; Scott JX Cheng is a co-author.

Research interests

Underwater acoustics and localization; robotics; wireless communication; communications systems architecture; control systems; power systems; PCB design; marine systems; neurotechnology.
